DEVI SWEETS · WEBSITE QUICK START

# Website Setup Guide

Included: **index.html** (mobile-friendly catalog website).

## Before Publishing

- Replace example prices, weights, discounts and offer dates with real details.
- Replace address, phone number, hours and About text.
- This is a catalog only. It does not accept orders or payments.
- After the website is live, use the QR section near the bottom of the page: paste the public HTTPS website URL and select **Generate QR code**. The QR generator uses an external online QR service, so it needs internet.

## Free Hosting with GitHub Pages

1. Sign in or create a GitHub account at https://github.com/
2. Create a new **PUBLIC** repository named **devi-sweets-catalog**.
3. Choose **Add file > Upload files** and upload **index.html** from this ZIP.
4. Commit the upload.
5. Open repository **Settings > Pages**.
6. Under **Build and deployment**, choose **Deploy from a branch**.
7. Choose branch **main** and folder **/(root)**, then Save.
8. Wait for deployment, then open the website URL shown on the Pages screen. It will usually look like **https://YOUR-USERNAME.github.io/devi-sweets-catalog/**
9. Test the link on another phone before printing the QR.

## Google Search

1. Visit https://search.google.com/search-console/
2. Add a URL-prefix property using the exact published website URL.
3. Complete one of the verification methods Google offers.
4. Open **URL Inspection**, enter the homepage URL and choose **Request indexing** if available.
5. Indexing and search display are not guaranteed or instant.

Note: The GitHub repository is public; do not upload passwords, private information or anything you don't want public.
